

UV Sanitation System & Ozone

Providing exceptional water sanitation, quality and clarity

2.1.13

Clearwater UV Sanitation System and Ozone Package

(UV by Trident™)

Clearwater Ultraviolet (UV) Sanitation System, paired with Clearwater Spas ozonator, has become the must-have feature combination for spa owners as it provides for exceptional biological water quality and clarity as it eradicates micro-organisms, bacteria, algae, yeasts, viruses and molds. This drastically reduces chemical use and provides easier spa water maintenance. **This system performs best with standard circ. pump (optional on XS Series Gold Package).**

Features & benefits:

- Drastically reduces chemical use
- Destroys the micro-organisms that chlorine cannot
- No chlorine smell and reduced chemical use helps prevent dry skin or damaged hair
- Easier spa maintenance, simple, reliable
- Prolongs spa life - won't erode surface or equipment
- Environmentally friendly
- Compatible with all types of coatings and filters
- Low operating cost – less than the cost of operating a small nightlight
- Made in the USA

Ultraviolet UV light, how it works:

The sun emits invisible light – ultraviolet light. Through leading edge technology, this natural phenomenon is reproduced inside the sanitizers of the Clearwater UV System Technology lamps (by Trident). At approximately 254 nanometers, the optimum wavelength for destroying micro-organisms (viruses, bacteria, algae, yeast, mold, etc.), these UV-C rays penetrate and disrupt their DNA, permanently deactivating germ cell metabolism so they cannot reproduce.

Engineered and designed specifically for spa water sanitation and maintenance

Relax knowing the spa water that you, your family and friends experience day after day is clean, safe and odorless.
